The PSoC® MiniProg3 Program and Debug Kit is an all-in-one programmer for PSoC 1, PSoC 3 and PSoC 5 architectures as well as a debug tool for PSoC 3 and PSoC 5 architectures. Included with the kit is a 10-pin ribbon cable for connecting to standard 10-pin JTAG header interfaces utilized for our PSoC 3 and PSoC 5 architectures while the device itself supports the 5-pin ISSP programming header for PSoC 1 architectures. Please note, this kit only contains the MiniProg3 and supporting cables; it is intended to provide you with an additional program/debug capability to meet your needs.

The kit contains:

- MiniProg3
- Program/Debug Ribbing Cable
- USB Cable

For PSoC training, please visit <http://www.cypress.com/go/training>.

Related Categories: PSoC® 5, PSoC® 3
